

ABCD Smart Campus — Complete Pre-Launch Testing Guide

One-Man Army Edition | Every feature, every role, best-to-worst test cases

WHO DOES WHAT (Roles Overview)

Role	Access
Public / Guest	Home, About, Services, Contact, Library Availability, Hall of Fame, Courses (public), Admission Form
Student (Library/Coaching)	Student Dashboard, My Seat, Complaints, Courses, Guidy (student side), Notifications, Profile, Todo, Alumni Dashboard (if alumni too)
Alumni	Alumni Dashboard, Hall of Fame, Achievement Form, Guidy (guide side)
Teacher / Staff	Teacher Dashboard (all tabs), Seat Manager, Fee Manager, Courses Manager, Broadcast, Progress, Visitor Insights, Todo, Guidy (teacher side)
Django Admin	<code>/admin/</code> — full DB access

TEST PRIORITY KEY

- CRITICAL — Must work perfectly or app is broken
- IMPORTANT — Core UX, must work
- NICE TO HAVE — Edge case, polish

SECTION 1 — PUBLIC / GUEST (No Login)

1.1 — Home Page

#	Test	Priority	Best Case	Worst Case
1	Home page loads without error		Open / as logged out	Open while DB is down
2	Theme toggle (dark/light) works		Click toggle, refresh — stays remembered	Toggle rapidly
3	All nav links work (About, Services, Contact)		Click each link	Click with slow network
4	Library availability button works		Click → see available seats	Click when no seats exist
5	Visitor intent tracking fires		Express interest in seat → intent recorded	Do it without login

1.2 — Registration

#	Test	Priority	Best Case	Worst Case
6	Register with valid new email		Fill all fields, submit → account created	Submit with existing email
7	Password mismatch shows error		Enter mismatching passwords	Submit form via direct POST
8	Email already registered shows error		Try to re-register same email	Same email, different username
9	Google OAuth registration works		Click "Continue with Google" → redirected properly	Google OAuth token expired
10	Register with weak password rejected		Type short password → error shown	1-char password submitted

1.3 — Login / Logout

#	Test	Priority	Best Case	Worst Case
11	Normal email/password login works		Login with valid creds → dashboard redirect	Wrong password 5 times
12	Mobile number login works		Login with mobile number	Login with partial mobile
13	Google OAuth login works		Login via Google → correct dashboard	Google popup blocked
14	Wrong password shows error		Wrong password → error, no crash	SQL-injection style input
15	Post-login router goes to right dashboard		Student → student dash, Teacher → teacher dash	User with no profile
16	Logout clears session		Click logout → redirect to home, back button shows no private data	Logout via direct URL

1.4 — Forgot Password (OTP Flow)

#	Test	Priority	Best Case	Worst Case
17	Enter registered email → OTP sent		Valid email → email received with OTP	Unregistered email
18	OTP verification works		Enter correct OTP → proceed to reset	Enter wrong OTP
19	OTP expiry — expired OTP rejected		Wait > 10 min, try OTP → rejected	Use OTP twice
20	Reset password page works		Enter new password → login with new pass	Paste password with spaces

1.5 — Admission Form

#	Test	Priority	Best Case	Worst Case
21	Form loads for non-logged user (redirects to register)		Open admission form without login → asked to register/login	
22	Logged in student can submit admission form		All fields filled correctly → submitted	Empty required fields
23	Profile photo upload works		Select photo → preview shown	Upload 20MB file
24	If photo exists, old photo shown in preview		User who already has photo → sees it in preview	
25	Photo replacement replaces across all profiles		Change photo in form → appears in dashboard & guidy	Save without confirming
26	Seat selector shows real-time availability		Select floor → available seats shown correctly	All seats occupied
27	Shift-enabled seats (40-53 Ground Floor) show shift option		Select seat 42 → morning/evening option appears	Select seat 1 → no shift shown
28	Duplicate service type form submission blocked		Already library student tries to resubmit library form	Submit same form in 2 tabs
29	Form submission creates StudentProfile with <code>pending</code> status		Submit → admin sees new pending student	DB error mid-submission

1.6 — Public Pages

#	Test	Priority	Best Case	Worst Case
30	<code>/library-availability/</code> shows correct seat map		Open → accurate available count	Open during seat update
31	<code>/resolved-complaints/</code> loads without login		Open page → see resolved complaints	No resolved complaints
32	<code>/hall-of-fame/</code> loads and shows achievements		Approved achievements displayed	No approved achievements
33	<code>/courses/</code> shows public-targeted courses		Guest sees public courses	No public courses
34	Contact form submission works		Fill form → success message	Missing email field

SECTION 2 — STUDENT DASHBOARD

2.1 — Student Dashboard (Main)

#	Test	Priority	Best Case	Worst Case
35	Dashboard loads correctly for admitted student		Login as admitted student → dashboard with all widgets	Pending/on-hold student
36	Dashboard shows pending/on-hold status message correctly		Login as pending student → see correct status badge	
37	Broadcast banners appear and dismiss works		Active broadcast → banner shown, X dismisses it	Banner dismissal fails silently
38	Notification bell shows unread count		Unread notifications → bell badge correct	100+ notifications
39	Theme switch persists across page refresh		Toggle dark → refresh → still dark	

2.2 — Profile

#	Test	Priority	Best Case	Worst Case
40	Profile page loads with all correct info		Open <code>/profile/</code> → all fields shown	Profile with missing fields
41	Change password works		Enter old + new password → success, can login with new	Wrong old password entered
42	OTP login toggle (enable/disable) works		Toggle OTP status → saved correctly	Toggle with no email set
43	Profile photo change updates across the app		Change photo in profile → seen in dashboard/guidy	Upload corrupted file
44	Guest profile details shows correct data		Open <code>/profile/guest/</code> → correct info	User with no student profile

2.3 — My Seat

#	Test	Priority	Best Case	Worst Case
45	Seat status shown correctly (occupied / on hold / none)		Open <code>/my-seat/</code> → correct info	Student with no seat
46	Request Seat Hold — valid duration submitted		Select date range → request submitted → appears in teacher dashboard	Select past date
47	Request Seat Hold — duplicate request rejected		Already has pending hold → can't request again	Submit twice rapidly
48	Cancel seat hold request works		Active hold → request cancel → teacher sees cancel request	Cancel already ended hold
49	Request Seat Switch — works with valid target seat		Select available seat → request submitted	Select occupied seat
50	Cancel seat switch request works		Pending switch → cancel button → cancelled	Cancel after approval
51	Seat map shows correct floor/shift availability		Interactive seat map loads, colors match status	Map with all seats occupied

2.4 — Complaints

#	Test	Priority	Best Case	Worst Case
52	Submit complaint with subject + message		Fill form → submit → success page shown	Empty message submitted
53	Custom subject works		Select "Other" → type custom subject → saves	Too-long subject text
54	Complaint success page shows submitted complaint		After submission → success page with details	Go back after submission
55	Rate resolved complaint (1–5 stars)		Resolved complaint → rate it → saved	Rate already rated complaint
56	Cannot rate pending/in-progress complaint		Try to rate pending → blocked	Direct POST to rating URL

2.5 — Courses (Student Side)

#	Test	Priority	Best Case	Worst Case
57	Course list shows relevant courses		Library student sees library-targeted courses	No courses assigned
58	Course detail page opens with videos + materials		Open course → playlist loads, materials listed	YouTube API down
59	Download study material works		Click download → file downloads correctly	Private material for guest
60	Submit course review (rating + comment)		Submit 5-star review → appears in course	Submit duplicate review
61	Submit course question works		Type question → submitted → shown in Q&A	Submit empty question
62	Upvote question/answer works		Click upvote → count increases	Upvote own question
63	Set learning reminder works		Set reminder for course → reminder appears in todo	Set reminder with past time
64	Like/Bookmark course (toggle interaction)		Click like → icon fills → click again → unfilled	

2.6 — Notifications

#	Test	Priority	Best Case	Worst Case
65	Notifications list loads		Open notification panel → all notifications shown	100+ notifications
66	Mark individual notification as read		Click notification → marked read, unread count drops	Click on already-read one
67	Mark all as read works		Click “mark all read” → all cleared	No notifications to mark
68	Delete individual notification		Delete → removed from list	Delete non-existent ID
69	Bulk delete notifications		Select multiple → delete → all removed	Select 0 then bulk delete
70	Mark notification as unread		Mark read → mark back unread → badge reappears	

SECTION 3 — ALUMNI DASHBOARD

3.1 — Alumni Access & Dashboard

#	Test	Priority	Best Case	Worst Case
71	Alumni dashboard loads for approved alumni		Login as alumni → <code>/alumni/dashboard/</code> loads	Non-alumni user accessing URL
72	Dual-role user (student + alumni) sidebar switching works		Student link → student dash, Alumni link → alumni dash	Switch rapidly
73	Alumni sees their submitted achievements		Dashboard shows achievement status (pending/approved)	No achievements submitted

3.2 — Achievement Form

#	Test	Priority	Best Case	Worst Case
74	Submit achievement form with all fields		Fill all fields + upload photo → submitted	Missing required fields
75	Achievement photo upload works		Upload image → preview shown → saved	Upload PDF instead of image
76	Edit existing achievement (before approval)		Open edit form → change data → saved	Edit after teacher approval
77	Delete achievement works		Delete pending achievement → gone from list	Delete already-approved one

3.3 — Hall of Fame (Public + Alumni)

#	Test	Priority	Best Case	Worst Case
78	Hall of Fame shows only approved achievements		Open <code>/hall-of-fame/</code> → only approved shown	Pending achievements not visible
79	Achievement detail page works		Click on achievement → detail page with full info	Achievement with missing fields
80	Rating display (stars) shows correctly		Approved achievement with rating → correct star count	Rating of 0

SECTION 4 — GUIDY (Mentorship & Chat)

4.1 — Guidy Home (Merged View)

#	Test	Priority	Best Case	Worst Case
81	Guidy home loads correctly from student dashboard		Open <code>/guidy/</code> as student → see alumni list + chats	No alumni in system
82	Guidy home loads correctly from alumni dashboard		Open <code>/guidy/</code> as alumni → see guidance requests	No pending requests
83	Dual-role user sees merged view (student+alumni conversations)		Login as both → all conversations visible in one guidy	
84	Role subtitle shows correctly (Student vs Alumni Guide)		When viewed as student → "Student" shown, not "Alumni Guide"	

4.2 — Guidance Requests (Student → Alumni)

#	Test	Priority	Best Case	Worst Case
85	Student sends guidance request to alumni		Click "Seek Guidance" → request sent → alumni notified	Request to blocked alumni
86	Check guidance status works		Open <code>/guidy/status/{alumni_pk}/</code> → correct status shown	Pending/rejected status
87	Alumni accepts guidance request		Alumni clicks accept → chat session opens	Accept already-accepted request
88	Alumni rejects guidance request		Click reject → student sees rejected status	
89	Alumni restricts student		Restrict → student can't send new requests	Try to request after restriction

4.3 — 1-on-1 Chat (Guidance + Direct)

#	Test	Priority	Best Case	Worst Case
90	Send text message works		Type message → send → appears for both	Send empty message
91	Send image/file in chat		Attach file → sends → visible to other user	Upload 50MB file
92	Poll (real-time message fetch) works		Send message → other side sees it within 2s	Very slow network
93	Delete message works (own messages only)		Long-press/click delete → message removed	Delete other user's message
94	Pin message works		Pin a message → appears in pinned section	Pin already-pinned message
95	Star message works		Star → appears in starred list	Star then unstar
96	Search messages in chat		Search keyword → matching messages highlighted	Search with no results
97	Load older messages works		Scroll up → "Load Older" → older messages appear	At very beginning of chat
98	End session works		Click end session → chat locked	End already-ended session
99	Clear chat works		Clear → messages gone for this user	Clear in empty chat
100	Delete session permanently		Delete → session gone from guidy home	

#	Test	Priority	Best Case	Worst Case
101	Block user works		Block → blocked user can't send	Block same user twice
102	Unblock user works		Unblock → can chat again	Unblock non-blocked user
103	Back button goes to correct dashboard		From Alumni Guidy → back → Alumni Dashboard (not Student)	

4.4 — Group Chat

#	Test	Priority	Best Case	Worst Case
104	Create group chat with multiple members		Add 3 users → create → group appears	Create group with 1 member
105	Send message in group		Message sent → all members see it	Send in inactive group
106	Group settings update (name, description)		Update name → saved → shown to all members	Blank name submitted
107	Add/remove members from group		Add new member → they see group	Remove only remaining member
108	Delete group for user (not for others)		Delete → gone from your list, still visible to others	
109	Pin/Star messages in group		Same as 1-on-1 pin/star	
110	Search messages in group		Search keyword → results shown	
111	Clear group chat for self		Clear → only your view cleared	

4.5 — Teacher in Guidy

#	Test	Priority	Best Case	Worst Case
112	Teacher can initiate direct chat with any student		Teacher → select student → direct chat opens	Select non-existent student
113	Teacher direct chat send/receive works		Both can message	Message when user blocked
114	Teacher Guidy profile update works		Update display name/bio → saved	Blank display name

4.6 — Profile Info Drawer in Guidy

#	Test	Priority	Best Case	Worst Case
115	Click user name → profile drawer opens		Drawer shows correct photo, name, role	Drawer for deleted user
116	Alumni photo shows in drawer (achievement photo, not student photo)		View alumni profile → achievement photo shown	
117	Student photo shown correctly for student view		View student profile → student photo shown	

SECTION 5 — TEACHER DASHBOARD

5.1 — Dashboard Main

#	Test	Priority	Best Case	Worst Case
118	Teacher dashboard loads all tabs correctly		Open <code>/teacher/</code> → all tabs load without error	Very large student count
119	Live stats API refreshes correctly		Stats update without page reload	API call with no data
120	Tab switching works smoothly		Click each tab → content loads, no duplicate JS	Click same tab twice

5.2 — Student Management

#	Test	Priority	Best Case	Worst Case
121	View student details page		Click student name → detail page loads correctly	Student with incomplete data
122	Approve student (pending → admitted)		Click Approve → status changes, student notified	Approve already-approved
123	Edit student details (name, mobile, etc.)		Edit fields → save → changes reflected	Blank required field
124	Delete student works		Delete → student + user account removed	Delete student with active seat
125	Upload profile photo for student		Choose photo → upload → appears in student card	Upload corrupted image
126	Delete student profile photo		Delete → photo removed, default avatar shown	Delete when no photo exists
127	Admission requests tab shows pending students		Pending students listed → approve/deny works	No pending students

5.3 — Holds Tab (Hold / Switch / Cancel-Hold)

#	Test	Priority	Best Case	Worst Case
128	Pending hold requests shown correctly		Hold requests visible with student info, seat, dates	No hold requests
129	Approve hold request → seat status changes to on_hold		Approve → seat locked, student notified	Approve same request twice
130	Deny hold request → seat stays occupied		Deny → seat stays, student notified	
131	Switch seat requests shown		Switch requests visible with current + target seat	No switch requests
132	Approve seat switch → seats reassigned		Approve → student moved to new seat	Target seat occupied
133	Reject seat switch → stays in current seat		Reject → no change, student notified	
134	Cancel-hold requests shown		Cancel hold requests visible	No cancel requests
135	Approve cancel-hold → seat returned to occupied		Approve → hold ended early, seat back	
136	Deny cancel-hold → hold continues		Deny → hold stays active	

5.4 — Seat Manager

#	Test	Priority	Best Case	Worst Case
137	Seat manager page loads with floor map		Open seat manager → both floors shown	No seats in DB
138	Assign seat to student manually		Select student + seat → assign → seat becomes occupied	Assign already-occupied seat
139	Remove student from seat		Click remove → seat freed	Remove from seat with hold
140	Lock/unlock specific seat (or shift)		Lock seat → appears locked in floor map	Lock already-locked seat
141	Teacher-initiated hold on seat		Teacher puts seat on hold → hold active	Hold on unoccupied seat
142	Export floor data (CSV/Excel)		Click export → file downloads correctly	Export empty floor
143	Real-time seat map updates		After action → map auto-refreshes correctly	Refresh with failed API

5.5 — Fee Management

#	Test	Priority	Best Case	Worst Case
144	Fee calendar view loads for a student		Open fee calendar → months shown with paid/unpaid status	Student with no payment history
145	Record a fee payment (month/year/amount)		Process fees → payment saved, expiry updated	Duplicate month payment
146	Delete a payment record		Delete payment → month shows unpaid again	Delete non-existent payment
147	Download fee receipt (PDF)		Click download → PDF generated and downloaded	Transaction with missing data
148	Fee expiry alerts appear in dashboard		Student with expired fee → alert shown	No expired fees
149	Dismiss fee expiry alert		Click dismiss → alert gone for this teacher	Dismiss same alert twice
150	Fees Record (accounting history) page loads		Open <code>/teacher/fees-record/</code> → all transactions listed	Thousands of transactions
151	Bulk delete fees records		Select multiple → delete → removed	Select 0 then bulk delete

5.6 — Complaints Management

#	Test	Priority	Best Case	Worst Case
152	Complaints tab shows all student complaints		All complaints listed with status, subject	No complaints
153	Update complaint status (pending → in progress → resolved)		Change status → student notified	Skip status (pending → resolved)
154	Delete complaint permanently		Delete → removed from list	Delete already-deleted ID
155	Complaint rating visible after student rates		Student rates → teacher sees star rating	Rating of 0 displayed

5.7 — Courses Management

#	Test	Priority	Best Case	Worst Case
156	Teacher courses list loads		Open /teacher/courses/ → all courses listed	No courses
157	Add new course manually		Fill form → add → appears in list	Blank title submitted
158	Edit existing course		Edit description/thumbnail → save → updated	Edit with no changes
159	Toggle course active/inactive		Click toggle → status changes → students can/can't see	Toggle inactive already-inactive
160	Delete course		Delete → gone from list, students can't access	Delete course with active students
161	Sync courses from YouTube playlist		Enter playlist ID → fetch → import videos	Invalid playlist ID
162	YouTube fetch playlists API works		Connect YT account → playlists listed	No YouTube API key set
163	Import playlist creates course with videos		Import → course created with all video materials	Playlist with 100+ videos
164	Create custom course (non-YouTube)		Add course without playlist → materials added manually	
165	Add study material to course		Upload PDF/video/link → appears in course materials	Upload 50MB file
166	Edit study material		Change title/file → updated	Blank title

#	Test	Priority	Best Case	Worst Case
167	Delete study material		Delete → gone from course	Delete material students have downloaded
168	Toggle material privacy (public/private)		Toggle → guests can/can't download	Toggle repeatedly
169	Bulk update materials (order/visibility)		Reorder materials → saved correctly	
170	Course preview page works		Open preview → looks correct as student would see	

5.8 — Broadcast Messages

#	Test	Priority	Best Case	Worst Case
171	Send broadcast to all students		Write message → send → all students get notification	No students in system
172	Send broadcast with attachment		Attach file → sends → visible in banner	Large attachment file
173	Send broadcast to specific group (library/coaching)		Select group → send → only that group notified	Group with 0 students
174	Save broadcast as draft		Save draft → appears in drafts list	Save empty draft
175	Resend failed broadcast		Failed broadcast → resend → now delivered	Resend already-delivered
176	Delete individual broadcast		Delete → gone from history	
177	Bulk delete broadcasts		Select multiple → delete all	
178	Broadcast history page loads		Open <code>/teacher/broadcast/history/</code> → all history shown	
179	Student banner dismissal works (student side)		Student dismisses banner → doesn't reappear	Dismiss already-dismissed

5.9 — Student Progress

#	Test	Priority	Best Case	Worst Case
180	Student progress page loads		Open → batches, students, scores shown	No performance records
181	Add performance record (test result)		Add batch/topic/total marks → saved	Duplicate topic in same batch
182	Enter student scores for a record		Enter marks for each student → saved	Enter marks > total marks
183	Progress display correct (student view)		Student sees their own score history	No scores for student

5.10 — Visitor Insights

#	Test	Priority	Best Case	Worst Case
184	Visitor insights page loads		Open → visitor intent list shown	No visitor records
185	Delete selected visitor intents		Select → delete → removed	Delete 0 selected
186	Clear all visitor intents		Clear all → empty list	Clear already-empty list

5.11 — Achievement Requests (Teacher Side)

#	Test	Priority	Best Case	Worst Case
187	Achievement requests tab shows pending achievements		Pending achievements listed with photo/details	No pending achievements
188	Approve achievement		Approve → appears on Hall of Fame, alumni notified	Approve already-approved
189	Reject achievement		Reject → removed from tab, alumni notified	

SECTION 6 — TODO HUB

#	Test	Priority	Best Case	Worst Case
190	Todo hub loads for teacher		Open <code>/todo/</code> → all tasks/notes/reminders visible	No tasks at all
191	Add a basic todo task		Click add → enter text → saved → appears in list	Empty task text
192	Add a note		Add note → saved with correct category	Very long note text
193	Add a fee reminder for a student		Search student → add reminder → appears in list	Student not found
194	Add a task breakdown (checklist)		Add breakdown with sub-items → shows checklist	Empty breakdown
195	Mark task as done		Click checkbox → task marked done	Mark already-done task
196	Pin/unpin task		Pin → appears at top	Pin max tasks
197	Trash task (soft delete)		Trash → moves to trash bin	Trash already-trashed task
198	Recover trashed task		Recover → back in active list	Recover non-existent task
199	Permanently delete task		Permanent delete → completely gone	Delete active (not trashed) task
200	Update task (edit text/priority)		Edit → save → updated	Blank text on save
201	Update task metadata (priority/label)		Change priority → reflected in UI	

#	Test	Priority	Best Case	Worst Case
202	Bulk action on tasks (mark all done, delete all)		Select multiple → bulk action → applied	Select 0 then action
203	Add reminder to task		Set reminder time → at that time → notification fires	Past time reminder
204	Update existing reminder on task		Change reminder time → saved	
205	Reminder action (dismiss/snooze)		Reminder pops → dismiss works	
206	Search students in todo (for fee reminders)		Type name → live search → results shown	Search empty string
207	Learning reminder integration (from courses)		Set reminder in course → appears in todo	

SECTION 7 — DJANGO ADMIN (/admin/)

#	Test	Priority	Best Case	Worst Case
208	Admin login works		Login as superuser → admin panel	Wrong password
209	StudentProfile list/search/filter works		Search student by name or mobile	Search with special characters
210	Inline status edit works (list_editable)		Change status inline → save → updated	Change 20 at once
211	Seat admin list shows occupants		Seat list → current_occupants column correct	Shift-enabled seat
212	CourseAdmin inline materials work		Open course → inline study materials shown	Course with 50+ materials
213	FeeTransaction receipt download from admin		Download receipt from admin record	
214	Complaint admin status edit inline		Change status in list → save	
215	GuidyBlock admin unblock action		Select pair → unblock → relationship removed	
216	BroadcastMessage list + filter works		Filter by message_type → correct results	
217	Delete student from admin also deletes User		Delete StudentProfile → User account gone too	

SECTION 8 — PUSH NOTIFICATIONS & PWA

#	Test	Priority	Best Case	Worst Case
218	VAPID public key endpoint responds		GET /api/vapid-public-key/ → returns key	Key not configured
219	Subscribe to push notifications		Grant browser permission → subscription saved in DB	Permission denied
220	Receive push notification (after broadcast)		Teacher sends broadcast → student gets push notification	Browser not supporting push
221	PWA installs from browser (Add to Home Screen)		Chrome prompts install → app installs	
222	Service worker registered correctly		Check DevTools → sw.js active	sw.js 404

SECTION 9 — SYSTEM / INFRASTRUCTURE

#	Test	Priority	Best Case	Worst Case
223	Health check endpoint works		GET <code>/healthz</code> → <code>{"status": "ok"}</code>	Server under load
224	Cron maintenance webhook responds		POST to <code>/api/cron/maintenance/</code> → maintenance tasks run	Cron called twice simultaneously
225	Scheduler runs seat reminders (send reminders before hold ends)		Hold expiring tomorrow → email/notification sent	Scheduler not running
226	Media files served correctly (photos, PDFs)		Open uploaded photo URL → file loads	File moved/deleted from server
227	<code>robots.txt</code> and <code>sitemap.xml</code> return correct content		GET both → valid content	
228	Email sending works (registration, OTP, notifications)		Trigger email → received in inbox	Email backend misconfigured
229	Engagement tracking API records events		Interact with course → POST to track-engagement → DB entry saved	

#	Test	Priority	Best Case	Worst Case
230	Seat interest API records visitor interest		Click interested on seat → record saved in VisitorIntent	Duplicate interest by same user

TESTING ORDER RECOMMENDATION (Best Approach for Solo Dev)

Phase 1 — Core Auth & Onboarding (Do First)

These unblock everything else. If auth breaks, nothing works.

1. Register → Login → Logout (Tests 6-16)
2. Forgot Password OTP flow (Tests 17-20)
3. Admission Form → submit (Tests 21-29)
4. Teacher: Approve the student you just submitted (Test 122)
5. Student Dashboard loads after approval (Test 35)

Phase 2 — Core Student Flows

Most used by real users daily

6. Profile & password change (Tests 40-44)
7. My Seat — view, request hold, request switch (Tests 45-51)
8. Complaints — submit, rate (Tests 52-56)
9. Courses — view, download material (Tests 57-64)
10. Notifications — read, delete (Tests 65-70)

Phase 3 — Teacher Core Actions

Teacher actions are critical path — they affect students

11. Teacher: All tabs load (Test 118-120)
12. Teacher: View/Edit/Delete student (Tests 121-126)
13. Teacher: Holds tab — approve/deny (Tests 128-136)

- 14. Teacher: Seat Manager — assign, remove, lock (Tests 137-143)
- 15. Teacher: Fee Management (Tests 144-151)
- 16. Teacher: Complaints management (Tests 152-155)

Phase 4 — Secondary Features

- 17. Guidy — 1-on-1 chat, guidance flow (Tests 81-103)
- 18. Guidy — Group chat (Tests 104-111)
- 19. Alumni — Achievement form, Hall of Fame (Tests 74-80)
- 20. Todo Hub — all task types (Tests 190-207)
- 21. Broadcast messages (Tests 171-179)

Phase 5 — Edge Cases & Infrastructure

- 22. Push notifications (Tests 218-222)
 - 23. Admin panel (Tests 208-217)
 - 24. Public pages, SEO, PWA (Tests 30-34, 221-222)
 - 25. Health checks, cron (Tests 223-230)
-

HIGH-RISK AREAS TO TEST VERY CAREFULLY

Area	Why Risky
Profile photo update	Must replace in ALL profiles, not just one
Seat hold/switch approval	DB state changes must be atomic — no partial updates
Fee payment recording	Must not allow duplicate month entries
Student delete in admin	Must cascade-delete the User account too
Guidy back button	Must return to correct dashboard (alumni vs student)
Dual-role user flows	Switching between student/alumni must not mix up contexts
Scheduler/cron reminders	Silent failures — if broken, nobody knows until deadline
YouTube sync import	If API quota exceeded, must fail gracefully
Push notification subscription	VAPID key mismatch causes silent failures
Email OTP expiry	Old OTPs must be invalidated after use

TIP: Use two browsers (Chrome + Firefox) or Chrome + Incognito to simulate two users simultaneously for chat and dual-role testing.

TIP: Keep Django's `runserver` console open while testing — errors and 500s will show there even if the page shows a generic error.
